

Featured Product: Model UB-601S/UBS-601S

Keep building hallways safe and dry by offering customers a complementary wet umbrella bag.

Place this stand in the lobby of the entrance way to provide customers with a plastic bag as they come in from the rain. The recyclable bag prevents water from being carried throughout the building to reduce the chance of slip and fall accidents. The stand comes standard in two basic finishes, but can be built with a variety of base styles and finishes to match any decor.

FACT: Slip and fall injuries are the third largest cause of work place injuries. (Bureau of Labor Statistics)

FACT: The average slip and fall injury costs \$28,000. (Bureau of Labor Statistics)
